Cabinet 2

Internal cabinet width _____ mm (wall to wall)
Internal cabinet depth _____ mm (front the back, not shelf depth)
Internal cabinet height _____ mm if all shelves removed
_____ mm between fixed shelves
Door obstruction* _____ mm
Hinge block width# _____ mm
Door _____ single door/double door/other?
Shelf _____ fixed, adjustable, other

What is the purpose of this cabinet?

Any other obstructions/relevant information we need to know?
Please provide photos or a sketch if required.

* Door Obstruction

Open door fully and measure how much door obstructs the internal width. It's usually 8-10mm but can be 0-25mm.

Hinge Block Width

Open door fully and measure the hinge block width. Hinges are generally 20-25mm, but can be as much as 60mm.
